Crisis Management in Anesthesiology, 2e By David M. Gaba MD, Kevin J. Fish MSc MB ChB FRCA FRCPC, Steven K. Howard MD, Amanda Burden MD

The fully updated Crisis Management in Anesthesiology continues to provide updated insights on the latest theories, principles, and practices in anesthesiology. From anesthesiologists and nurse anesthetists to emergency physicians and residents, this medical reference book will effectively prepare you to handle any critical incident during anesthesia.

"A comprehensive discussion of the latest theories, principles and practices for CRM in perioperative practice and will be a useful resource for anaesthetists of all grades and levels of experience" **Reviewed by** British Journal of Anaesthesia, Jun 2015

"...this book contains essential information that all anesthesiologists should know or readily be able to easily reference..." **Reviewed by** Jane Torrie, Oct 2015

"Every anesthesia provider needs to study, not just read, this new edition, even if you read the first edition. Also, distilled instructions of key elements of the cases covered in this book need to be included in manuals made available for emergencies (although that, too, needs further study on how best to use them). If I were your patient, I would ask if you had studied these principles. If you hadn't, I might ask for another health care provider into whose hands I would want to entrust my life." **Foreword by:** Jeffrey B. Cooper, PhD Harvard Medical School, Boston, Massachusetts, July 2015

- **Identify and respond to a broad range of life-threatening situations** with the updated **Catalog of Critical Incidents**, which outlines what may happen during surgery and details the steps necessary to respond to and resolve the crisis.
- **React quickly** to a range of potential threats with an added emphasis on simulation of managing critical incidents.
- **Useful review for all anesthesia professionals** of the core knowledge of diagnosis and management of many critical events.

- **Explore new topics** in the ever-expanding anesthesia practice environment with a detailed chapter on debriefing.
- **Expert Consult eBook version included with purchase.**

Editorial Review

Review

"The distinguished authors of this latest edition build on these foundations, which now include new chapters on teaching CRM and the vitally important skill of debriefing colleagues after they have experienced such challenging events. The catalogue of critical incidents has been completely overhauled and updated, to reflect contemporary practice with nearly 20 new scenarios added". **Reviewed by** British Journal of Anaesthesia, Jun 2015

"Those preparing for examinations, including maintenance of certification, or those preparing others for these exams will find this book to be an excellent resource." **Reviewed by** Jane Torrie, Oct 2015

"This is a tremendous book with the single focus of improving patient safety in the fluid situation of anesthesia administration. Every residency program has a curriculum to deal with predictable situations, but not necessarily with unpredictable situations. Other books on similar topics stress medical knowledge to improve the safety of patients, but this is the only one that highlights the importance of the development of cognitive and behavioral skills that are important for averting disaster in crisis situations. This is a must read for safe and better care of patients under anesthesia."

-Tariq M. Malik, MD (University of Chicago Pritzker School of Medicine) **Doody's Score: 100 – 5 Stars!**

"Who should buy this book? The authors state in the Preface that they wrote it for everyone who administers anesthesia, from trainees to experienced practitioners. I have to say that I enthusiastically agree!"

-Manuel Pardo, Jr., M.D., University of California (*Anesthesiology* 2016; 124:738-40)

Users Review

From reader reviews:

Michelle Huffman:

Reading a e-book tends to be new life style within this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Having book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their own reader with their story or maybe their experience. Not only the storyplot that share in the ebooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some exploration before they write to their book. One of them is this Crisis Management in Anesthesiology, 2e.

Paula Shepard:

Many people spending their time by playing outside along with friends, fun activity having family or just watching TV the whole day. You can have new activity to enjoy your whole day by looking at a book. Ugh, think reading a book really can hard because you have to bring the book everywhere? It all right you can have the e-book, taking everywhere you want in your Cell phone. Like Crisis Management in Anesthesiology, 2e which is getting the e-book version. So , why not try out this book? Let's view.

Ellis Pauling:

As a scholar exactly feel bored for you to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading through is not important, boring along with can't see colorful pics on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Crisis Management in Anesthesiology, 2e can make you really feel more interested to read.

Willie Bergeron:

Publication is one of source of knowledge. We can add our understanding from it. Not only for students and also native or citizen have to have book to know the up-date information of year to be able to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, can also bring us to around the world. Through the book Crisis Management in Anesthesiology, 2e we can acquire more advantage. Don't that you be creative people? For being creative person must prefer to read a book. Just choose the best book that suitable with your aim. Don't always be doubt to change your life at this time book Crisis Management in Anesthesiology, 2e. You can more appealing than now.
