#### **Review**

"...the book is engaging, easy to read, and contains a great deal of useful information, especially from a surgical perspective." Doody's Review Services

#### **About the Author**

Jeremy Price is a radiologist at The Canberra Hospital and at BreastScreen ACT, Australia. He was born in the UK and trained at Guys' and St Thomas' Hospitals, London before completing his radiology training at The John Radcliffe Hospital, Oxford. Following a spell as a Lecturer in Radiology at the Chinese University of Hong Kong, he then migrated to Australia. Working in both the public and private sectors, he gained wide experience in symptomatic breast imaging and in mammography screening and began his interest in breast MRI in the mid 1990s. Jeremy denies being an expert and says the book is written from the perspective of a 'journeyman radiologist' who has grappled with the evolving concepts of breast MRI since the first commercial breast coils became available.
