The Lightning Discharge (Dover Books on Physics) By Martin A. Uman, Physics

In this readable, absorbing, up-to-date monograph, one of the nation's foremost experts on lightning sets forth most of what has been learned about the subject. To make the material more easily understandable, the author has organized the chapters primarily by lightning process. Following a general introduction and chapters on lightning phenomenology and cloud and lightning charges, he looks into the types and stages of lightning, with chapters on the stepped leader, the attachment process, the return stroke, the dart leader, continuing current, J- and K-processes in discharges to the ground, positive lightning, upward lightning and the artificial initiation of lightning, and cloud discharges. In the final two chapters, Dr. Uman investigates lightning on other planets and examines the phenomenon of thunder.

Each chapter contains a reference list, and the book as a whole is augmented with a generous selection of diagrams, charts, and photographs. Appendices on electromagnetics, statistics, and experimental techniques help to clarify some of the concepts covered in the text. A fourth appendix lists relevant books. Of special interest to physicists, meteorologists, and electrical engineers, the newly corrected edition of this detailed study offers a deep understanding of one of nature's most intriguing phenomena. 144 illustrations. Appendices. Index.

Editorial Review

About the Author

Martin A. Uman was the co-founder and President of Lightning Location and Protection, Inc. (LLP) and is now a professor and Chair of the Department of Electrical and Computer Engineering at the University of Florida.

Users Review

From reader reviews:

Kenneth Roberts:

As people who live in often the modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to you actually is you don't know what kind you should start with. This The Lightning Discharge (Dover Books on Physics) is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Richard Simpson:

Reading a guide can be one of a lot of exercise that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new information. When you read a reserve you will get new information due to the fact book is one of several ways to share the information or perhaps their idea. Second, reading a book will make an individual more imaginative. When you studying a book especially fiction book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to other folks. When you read this The Lightning Discharge (Dover Books on Physics), you can tells your family, friends and also soon about yours guide. Your knowledge can inspire others, make them reading a guide.

Bruce Williamson:

You can spend your free time to see this book this book. This The Lightning Discharge (Dover Books on Physics) is simple to develop you can read it in the park, in the beach, train and also soon. If you did not have much space to bring often the printed book, you can buy the particular e-book. It is make you easier to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

James Martin:

Is it a person who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something new? This The Lightning Discharge (Dover Books on Physics) can be the response, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?
