A First Course in Real Analysis (Undergraduate Texts in Mathematics)

By Sterling K. Berberian

A First Course in Real Analysis (Undergraduate Texts in Mathematics) By Sterling K. Berberian

Mathematics is the music of science, and real analysis is the Bach of mathematics. There are many other foolish things I could say about the subject of this book, but the foregoing will give the reader an idea of where my heart lies. The present book was written to support a first course in real analysis, normally taken after a year of elementary calculus. Real analysis is, roughly speaking, the modern setting for Calculus, "real" alluding to the field of real numbers that underlies it all. At center stage are functions, defined and taking values in sets of real numbers or in sets (the plane, 3-space, etc.) readily derived from the real numbers; a first course in real analysis traditionally places the emphasis on real-valued functions defined on sets of real numbers. The agenda for the course: (1) start with the axioms for the field of real numbers, (2) build, in one semester and with appropriate rigor, the foun dations of calculus (including the "Fundamental Theorem"), and, along the way, (3) develop those skills and attitudes that enable us to continue learning mathematics on our own. Three decades of experience with the exercise have not diminished my astonishment that it can be done.

Editorial Review

Review
"Main attention is given to ideas, concepts, theorems, types of reasoning and less to routine aspects and computation techniques." -- *ZENTRALBLATT MATH*

Users Review

From reader reviews:

Dale Hollander:

Many people spending their moment by playing outside using friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading through a book. Ugh, do you consider reading a book will surely hard because you have to take the book everywhere? It okay you can have the e-book, having everywhere you want in your Mobile phone. Like A First Course in Real Analysis (Undergraduate Texts in Mathematics) which is keeping the e-book version. So , try out this book? Let's observe.

Roger Lee:

That book can make you to feel relax. This kind of book A First Course in Real Analysis (Undergraduate Texts in Mathematics) was colorful and of course has pictures on there. As we know that book A First Course in Real Analysis (Undergraduate Texts in Mathematics) has many kinds or category. Start from kids until teens. For example Naruto or Detective Conan you can read and think you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading in which.

Betty Perez:

A lot of e-book has printed but it is different. You can get it by web on social media. You can choose the best book for you, science, amusing, novel, or whatever by simply searching from it. It is named of book A First Course in Real Analysis (Undergraduate Texts in Mathematics). Contain your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make anyone happier to read. It is most essential that, you must aware about e-book. It can bring you from one place to other place.

Evelyn Montgomery:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. So you know that little person including reading or as studying become their hobby. You need to know that reading is very

important and also book as to be the factor. Book is important thing to increase you knowledge, except your own teacher or lecturer. You find good news or update regarding something by book. Numerous books that can you go onto be your object. One of them is A First Course in Real Analysis (Undergraduate Texts in Mathematics).
