Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety By Meena Marafi, Anthony Stanislaus, Edward Furimsky

This handbook serves scientists and researchers interested in any aspect of spent hydroprocessing catalysts. Its aim is to assist in the analysis and assessment of refined catalyst byproducts and processing options, to determine whether spent catalysts can be processed into productive resources. For non-regenerable spent catalysts, the book takes into consideration both safety and ecological implications of utilizing landfill and other waste options.

- Provides comprehensive guidance and assistance to those making decisions on the fate of spent catalysts, radically improving strategic options for refining organisations
- Offers solutions that maximize procedural, regulatory, safety, and preparedness benefits
- Contains detailed information on hazardous characteristics of spent and regenerated catalysts with deployment recommendations, and acts as a benchmark document for establishing threshold limits of regulated species as well as for developing procedures for handling spent catalysts to ensure environmental acceptance

Editorial Review

About the Author

Dr. Marafi received her Ph.D. in Chemical Engineering from Aston University/England. Her areas of specialization include: petroleum refining/processes and catalysis, catalyst deactivation, regeneration, rejuvenation and recycling, crude oil assay, petroleum characterization and catalyst development. Dr. Marafi has over 88 publications, including, 2 books, 25 papers published in refereed journals, 25 papers presented in international/local conferences, and 36 reports (technical reports/final reports/progress reports related to projects carried out). Lead 14 contractual projects in the area of petroleum refining and catalysis.

Dr. Stanislaus has over 30 years of research experience in catalysts and processes related to petroleum refining. His research experience includes: upgrading of petroleum residues by catalytic hydroprocessing, deep desulfurization and aromatics hydrogenation of diesel blending streams (clean fuels production), naphtha catalytic reforming for octane improvement, kinetics of hydrotreating reactions, catalyst deactivation and regeneration, spent catalyst reactivation and utilization, catalyst development, characterization, and performance testing. He has published over 100 scientific papers in International Journals and books.

Dr. Furimsky has some forty years of research in the conversion of petroleum, coal and natural gas to various commercial products. The studies on upgrading petroleum feeds included hydrodesulfurization, hydrodenitrogenation, hydrodeoxygenation, catalyst deactivation and regeneration. The environmental and safety aspects as well as utilization options for spent refinery catalysts were part of the research as well. Scientific productivity includes two books, several book chapters and a dozen of reviews on various aspects of hydroprocessing catalysis, petroleum refining and utilization of refinery residues. Some 130 articles appeared in the referred scientific journals.

Users Review

From reader reviews:

Luther Brown:

This book untitled Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit upon it. You will easily to buy that book in the book retail store or you can order it by using online. The publisher of the book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Cell phone. So there is no reason for your requirements to past this reserve from your list.

Ethelyn Allen:

The particular book Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety will bring one to the new experience of reading a new book. The author style to elucidate the idea is very unique. Should you try to find new book to study, this book very ideal to you. The book Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation,

Reclamation, Environment and Safety is much recommended to you to read. You can also get the e-book in the official web site, so you can quickly to read the book.

Curtis Graham:

The guide untitled Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety is the e-book that recommended to you you just read. You can see the quality of the book content that will be shown to an individual. The language that creator use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, to ensure the information that they share to you is absolutely accurate. You also could get the e-book of Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety from the publisher to make you far more enjoy free time.

Judith Ellis:

Publication is one of source of information. We can add our understanding from it. Not only for students but also native or citizen want book to know the change information of year to year. As we know those publications have many advantages. Beside many of us add our knowledge, can also bring us to around the world. By book Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety we can consider more advantage. Don't someone to be creative people? To become creative person must choose to read a book. Just choose the best book that ideal with your aim. Don't become doubt to change your life by this book Handbook of Spent Hydroprocessing Catalysts: Regeneration, Rejuvenation, Reclamation, Environment and Safety. You can more pleasing than now.
