An accompanying DVD with interactive motion menus includes 120 minutes of video that display clinical dissection of the shoulder.

- 60 cadaver photos, placed alongside the anatomical illustrations, help the reader visualize musculature and anatomical structures.
- Assessment models and photographs for the shoulder girdle complex provide step-by-step procedures to help perform a patient assessment.
- More than 50 illustrated exercises that may be used in patient treatment are designed to improve the strength, power, and endurance of the global and local muscles associated with the shoulder girdle.
