## Editorial Review

From School Library Journal

Kindergarten-Grade 2?As in his *Biggest, Strongest, Fastest* (Ticknor & Fields, 1995), Jenkins once again uses striking colorful paper collage illustrations to explore a topic. Here, he delves into the greatly varied marvels of the world, presenting the highest mountain, the hottest spot, the wettest place, the most active volcano, etc. Interesting charts help put sizes into perspective. For example, on the double-page spread that introduces the longest river, a side box shows the length of the Nile in comparison to that of other rivers as well as to the width of the United States. The oldest and deepest lake, Lake Baikal in Russia (5134 feet deep), is contrasted pictorially with the height of the Empire State Building (1250 feet). These visuals give young readers a full understanding of how amazing these natural wonders are. Each spread includes a map that shows where these places are located. Browsers will pick up this delightful picture book and read it through completely. This eye-catching introduction to geography will find a lot of use in libraries and classrooms.?Anne Chapman Callaghan, Racine Public Library, WI

Ages 4^-8. In this world record book of natural history, Jenkins identifies and describes places such as the planet's deepest lake, highest mountain, most active volcano, the most extreme tides, and the places designated the hottest, the coldest, the wettest, the driest, and the windiest on Earth. Each spread features a distinctive collage of cut-and-torn papers, which vary in texture and hue. Silhouetted forms provide dramatic focal points in the compositions. Each spread includes a couple of lines of text, supplemented with more information in smaller type and inset maps and diagrams that help the reader visualize just *how* high, deep, or wet the subject is in comparison with others of its kind. Highly effective visual education for the classroom or for young browsers intrigued by superlatives. *Carolyn Phelan*

## Review

"In this world record book of natural history, Jenkins identifies and describes places such as the planet's deepest lake, highest mountain, most active volcano, the most extreme tides, and the places designated the hottest, the coldest, the wettest, the driest, and the windiest on Earth. Each spread features a distinctive collage of cut-and-torn papers, which vary in texture and hue. Silhouetted forms provide dramatic focal points in the compositions. Each spread includes a couple of lines of text, supplemented with more information in smaller type and inset maps and diagrams that help the reader visualize just how high, deep, or wet the subject is in comparison with others of its kind. Highly effective visual education for the classroom of for young browsers intrigued by superlatives." *Booklist*, ALA

"Once again, Jenkins provides jaw-dropping facts and extremely elegant paper collages to illustrate the amazing natural world. Readers are introduced to the deepest ocean trench, the highest mountain (in terms of elevation) and the tallest (from foot to summit), the longest river, the hottest patch, the coldest, the most active volcanoes, the most extreme tides. The lyric beauty and sense Jenkins brings to his collages manifest a sense of place. Inset maps - global and regional - and measurement charts (often using humans and the Empire State Building for scale) allow these extremes to make geographical and quantitative sense." *Kirkus Reviews*

"As in *Biggest, Strongest, Fastest*, Jenkins once again uses striking colorful paper collage illustrations to explore a topic. Here, he delves into the greatly varied marvels of the world. . . . Interesting charts help put

sizes into perspective. . . . These visuals give young readers a full understanding of how amazing these natural wonders are. Each spread includes a map that shows where these places are located. Browsers will pick up this delightful picture book and read it through completely. This eye-catching introduction to geography will find a lot of use in libraries and classrooms." It should be here for a person. So , don't miss that! Just read this e-book variety for your better life in addition to knowledge.

#### **Arthur Faust:**

As a college student exactly feel bored to reading. If their teacher requested them to go to the library or to

make summary for some publication, they are complained. Just tiny students that has reading's heart or real their pastime. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful photos on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Hottest, Coldest, Highest, Deepest can make you truly feel more interested to read.
