## Manhattan Project: The Birth of the Atomic Bomb in the Words of Its Creators, Eyewitnesses, and Historians

From Kelly, Cynthia C. (EDT)/ Rhodes, Richard (INT)

The first collection ever of the writings and insights of the original creators of the atomic bomb, along with pieces by the most important historians and interpreters of the subject, is now in paperback.

Born out of a small research program begun in 1939, the Manhattan Project eventually employed more than 130,000 people, including our foremost scientists and thinkers, and cost nearly \$2 billion?and it was operated under a shroud of absolute secrecy. This groundbreaking collection of documents, essays, articles, and excerpts from histories, biographies, plays, novels, letters, and the oral histories of key eyewitnesses is the freshest, most exhaustive exploration yet of the topic.

Compiled by experts at the Atomic Heritage Foundation, the book features first-hand material by Albert Einstein, Leslie Groves, J. Robert Oppenheimer, Leo Szilard, Enrico Fermi, Richard Feynman, Niels Bohr, Henry Stimson, and many others.

Dozens of photographs depict key moments and significant figures, and concise explanatory material accompanies each selection. The project's aftermath and legacy are covered as well, making this the most comprehensive account of the birth of the atomic age.

### Editorial Review

From Publishers Weekly

*Starred Review.* More than 60 years since WWII was ended by two atomic detonations, the Manhattan Project that made them possible still carries iconic weight, both as an incredible achievement of science and engineering and as the opening salvo in the nuclear arms race. This collection of essays, including excerpts from 45 books and almost twice as many articles, is more than worthy of its subject. The basic science behind the project is detailed in a number of lively accounts by scientists who worked on it; they also recount the lighter side of the experience, including the characters they worked alongside and the camaraderie among them. In-depth analysis of policy and ethical issues take on the justification for Truman's decision to bomb Hiroshima and Nagasaki (with fine examples from both sides of the argument) and the still-urgent need for global arms control (as argued in a 2007 Wall Street Journal article by Henry Kissinger et al). With a comprehensive reach (going as far back as 1934 to find a charming story on Oppenheimer, "The Absentminded Professor"), Kelly, president of the Atomic Heritage Foundation and an experienced editor (Oppenheimer and the Manhattan Project) does a masterful job covering all aspects of the world-changing enterprise and its legacy.

### Review

"I was enthralled by these vivid and compelling accounts of personalities and events at Los Alamos and elsewhere that produced the Bomb, ended a World War, and transformed our lives forever."—Bruce Babbitt, former U.S. Secretary of the Interior and Governor of Arizona

### From the Inside Flap

Born out of a small research program that began in 1939, the Manhattan Project brought together the cream of the scientific community and the military to create and perfect a weapon more powerful than any the world had known. Racing against time as the war raged in Europe and Asia, and against our enemies, whom we feared were pursuing similar ends, the Project would eventually employ more than 125,000 people and cost a total of over \$2 billion--and the entire operation was conducted under a shroud of secrecy, at remote sites around the country. This groundbreaking book--the first of its kind--collects the writings and thoughts of the original participants in the Manhattan Project, along with pieces by the most important historians and interpreters of the subject. It is a rich and comprehensive compilation of documents, essays, articles, and excerpts from histories, biographies, plays, novels, letters, oral histories, and more, and is the freshest, most multi-faceted exploration yet of the topic. Including material by and about J. Robert Oppenheimer, Leo Szilard, Albert Einstein, Richard Feynman, Leslie Groves, Klaus Fuchs, Henry Stimson, Vannevar Bush, Harry S. Truman, Niels Bohr, and many other key figures, it also collects the writings and testimony of those in the trenches at the Project, their families, and local eyewitnesses. Finally, the book includes thoughts and concerns about the bomb, set down in the aftermath of its deployment, by politicians, writers, artists, and others who saw that the world would never again be the same. Assembled with authority and care by the president of the Atomic Heritage Foundation--in cooperation with a team of advising historians that included the Pulitzer Prize-winning Richard Rhodes--"The Manhattan Project "is an invaluable addition to the historical record as well as a gripping narrative of scientific discovery, military strategy, and moral reflection.

## Users Review

### From reader reviews:

#### **Michael Wickham:**

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim as well as goal; it means that publication has different type. Some people truly feel enjoy to spend their the perfect time to read a book. They may be reading whatever they acquire because their hobby will be reading a book. Consider the person who don't like looking at a book? Sometime, man or woman feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will want this Manhattan Project: The Birth of the Atomic Bomb in the Words of Its Creators, Eyewitnesses, and Historians.

#### **Melanie Roberts:**

Have you spare time to get a day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to often the Mall. How about open or perhaps read a book titled Manhattan Project: The Birth of the Atomic Bomb in the Words of Its Creators, Eyewitnesses, and Historians? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with their opinion or you have various other opinion?

#### **Timothy Grill:**

A lot of people always spent their own free time to vacation or even go to the outside with them friends and family or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity here is look different you can read a book. It is really fun in your case. If you enjoy the book which you read you can spent all day every day to reading a e-book. The book Manhattan Project: The Birth of the Atomic Bomb in the Words of Its Creators, Eyewitnesses, and Historians it is extremely good to read. There are a lot of people that recommended this book. They were enjoying reading this book. If you did not have enough space to bring this book you can buy the actual e-book. You can m0ore easily to read this book from your smart phone. The price is not too expensive but this book provides high quality.

#### **Rose Miller:**

What is your hobby? Have you heard this question when you got learners? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person just like reading or as studying become their hobby. You need to understand that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is actually Manhattan Project: The Birth of the Atomic Bomb in the Words of Its Creators, Eyewitnesses, and

Historians.
