The Social Construction of the Ocean (Cambridge Studies in International Relations) By Philip E. Steinberg

The worlds' oceans have been extremely important in the development and interaction of societies throughout history. This unique book uses the tools of political geography and international relations to examine the ways in which nations and peoples have viewed and used the oceans. Most social scientists have looked on the seas as a resource, but Steinberg sees them as a space defined by society, arguing that political and economic forces have shaped the governance and representation of the sea as much as they have the land.

Editorial Review

Review

"Steinberg lucidly summarizes the book's major themes: the sea is not a place, but it is a space 'where social contradictions are worked through, social change transpires, and future social relations are imagined' (p. 209). This is an apt summary of an excellent book, which makes a highly original contribution to a much-underconsidered portion of political geography in theoretically-nuanced and empirically-informative ways. It is not only the first such major contribution to the study of the political economy-and-geography of the oceans, but destined to be a classic." *Political Geography*

"This is much more than a social constructionist's book about the sea. Steinberg has produced a splendid, innovative text that will be of interest to all social scientists with an interest in the historical development of the modern world from outside narrow nationalist perspectives." Peter J. Taylor, Loughborough University

"The subject is fascinating, and the author offers an admirable sweep of the ways in which the ocean has been used and depicted over the past 500 years or so. He draws on a rich variety of source materials, and some of [his] ideas sparkle...." *Choice*

"In a relatively short book, Philip Steinberg succeeds in explaining the social and historical nature of our past and present conceptualizations of the sea." *Journal of World History*, Hans K. Van Tilburg, NOAA Ocean Service

Users Review

From reader reviews:

Angela Dickens:

As people who live in the particular modest era should be update about what going on or info even knowledge to make these individuals keep up with the era that is always change and progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to a person is you don't know what type you should start with. This *The Social Construction of the Ocean (Cambridge Studies in International Relations)* is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Bertha Underwood:

Many people spending their moment by playing outside together with friends, fun activity having family or just watching TV the whole day. You can have new activity to shell out your whole day by reading a book. Ugh, do you think reading a book can really hard because you have to accept the book everywhere? It alright you can have the e-book, getting everywhere you want in your Cell phone. Like *The Social Construction of the Ocean (Cambridge Studies in International Relations)* which is obtaining the e-book version. So , try out this book? Let's view.

Mable Watkins:

As a scholar exactly feel bored for you to reading. If their teacher expected them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this The Social Construction of the Ocean (Cambridge Studies in International Relations) can make you experience more interested to read.

Diane Lomas:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half parts of the book. You can choose the actual book The Social Construction of the Ocean (Cambridge Studies in International Relations) to make your reading is interesting. Your personal skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be first opinion for you to like to wide open a book and go through it. Beside that the book The Social Construction of the Ocean (Cambridge Studies in International Relations) can to be a newly purchased friend when you're experience alone and confuse with what must you're doing of that time.
