Advanced Respiratory Critical Care (Oxford Specialist Handbooks in Critical Care) By Martin Hughes, Roland Black, Ian Grant

Respiratory disease is the most common reason for admission to intensive care and advanced respiratory support is one of the most frequently used interventions in critically ill patients. An intimate understanding of respiratory disease, its diagnosis, and its treatment, is the cornerstone of high quality intensive care. This book includes detailed sections on invasive ventilation, including the principles of each ventilatory mode and its applications in clinical practice. Each disease is discussed at length, with advice on management. The book is aimed primarily at trainees in intensive care and specialist nurses, but will also appeal to both trainees and more senior staff in anaesthesia and respiratory medicine.

Editorial Review

Review

...a bridge between comprehensive textbooks and brief introductory presentations...this book meet[s] and exceed[s] the standard of larger works. While this book has a European flavor, the clear presentation serves all audiences. David J. Dries, Surgical Director, Pediatric Intensive Care Unit, Gillette Children's Hospital, St. Paul, MN, USA

About the Author

Martin Hughes is a consultant in Intensive Care Medicine in the University Department of Anaesthesia at the Royal Infirmary in Glasgow. Roland Black is a consultant in Intensive Care Medicine at the Royal Devon and Exeter Hospital, UK.

Users Review
