Good Practice in Risk Assessment and Risk Management 2: Key Themes for Protection, Rights and Responsibilities (Good Practice in Health, Social Care and Criminal Justice) (v. 2) From Brand: Jessica Kingsley Pub

The companion volume to Good Practice in Risk Assessment 1 looks at further issues in the field of risk assessment. Managers are under increasing pressure to predict risk accurately, and face serious consequences for failure. This new collection explores the arguments and means of assessment in a clear and accessible manner and with a practice-based emphasis. The contributors consider subjects as varied as child adoption, violence, mental health, alcohol and suicide in a wide range of social care settings, all linked by the difficulty of accurately assessing risk.

Editorial Review

Review

A comprehensive overview of practice issues... [The] chapters are well-written and informed with arguments well supported by pertinent case study material. The book will prove a useful tool to those working with risk in providing practical strategies for effective intervention and, in some chapters, accessible exercises for use in staff development and training. The contributors are to be commended for providing a balanced perspective and seeking to challenge the pervasive negative connotations typically applied to risk behaviours. [The editors] have succeeded in producing a well written text which deals with issues and dilemmas related to risk in a clear and forthright manner. Social workers, and their managers will benefit from the objective stance provided in an increasingly prioritized and significant area of influence on practice. -- British Journal of Social Work It embraces a wide range of practice settings - examining areas such as child adoption, violence, mental health, alcohol and suicide... It is targeted at both staff and managers who face dilemmas on a daily basis with risk decision making... The use of case studies and personal experiential accounts add real meat to the bones of some of the issues outlines and gives the book a genuine feel of being based and strongly informed by practice, alongside past and academic research material. Whilst I found myself instinctively drawn to areas of practice with which I am currently involved, I found that there was something in each chapter that I could relate to and use. Overall, this is an excellent publication for practitioners, managers and trainers in health, social work and probation services. -- Action on Elder Abuse The book provides a useful collection of practice-based contributions which offer an overview of current attempts to implement strategies of risk...encourages the reader to adopt a more holistic approach to risk, identifying the rights and dignity of the client alongside the expectation to 'protect the public'. -- Probation Journal A great asset... For therapists in mental health or community care there are useful chapters which give additional background reading. Case studies help to explain the issues being discussed and encourage you to think further. A comprehensive bibliography follows the end of each chapter. -- Therapy Weekly This new collection explores the arguments and means of assessment in a clear and accessible manner and with a practice-based emphasis. -- Childright

Review

A comprehensive overview of practice issues... [The] chapters are well-written and informed with arguments well supported by pertinent case study material. The book will prove a useful tool to those working with risk in providing practical strategies for effective intervention and, in some chapters, accessible exercises for use in staff development and training. The contributors are to be commended for providing a balanced perspective and seeking to challenge the pervasive negative connotations typically applied to risk behaviours. [The editors] have succeeded in producing a well written text which deals with issues and dilemmas related to risk in a clear and forthright manner. Social workers, and their managers will benefit from the objective stance provided in an increasingly prioritized and significant area of influence on practice. (British Journal of Social Work)

It embraces a wide range of practice settings - examining areas such as child adoption, violence, mental health, alcohol and suicide... It is targeted at both staff and managers who face dilemmas on a daily basis with risk decision making... The use of case studies and personal experiential accounts add real meat to the bones of some of the issues outlines and gives the book a genuine feel of being based and strongly informed by practice, alongside past and academic research material. Whilst I found myself instinctively drawn to areas of practice with which I am currently involved, I found that there was something in each chapter that I

could relate to and use. Overall, this is an excellent publication for practitioners, managers and trainers in health, social work and probation services. (Action on Elder Abuse)

The book provides a useful collection of practice-based contributions which offer an overview of current attempts to implement strategies of risk...encourages the reader to adopt a more holistic approach to risk, identifying the rights and dignity of the client alongside the expectation to 'protect the public'. (Probation Journal)

A great asset... For therapists in mental health or community care there are useful chapters which give additional background reading. Case studies help to explain the issues being discussed and encourage you to think further. A comprehensive bibliography follows the end of each chapter. (Therapy Weekly)

This new collection explores the arguments and means of assessment in a clear and accessible manner and with a practice-based emphasis. (Childright)

About the Author

Hazel Kemshall is currently Professor of Community and Criminal Justice at DeMontfort University. She was previously a senior lecturer at Birmingham University and has practice and management experience with the Probation Service. She has written extensively on risk assessment and risk management, and has recently completed research for the Economic and Social Research Council. Jacki Pritchard qualified as a social worker and has worked as a practitioner and manager in both fieldwork and hospital settings. She is also an accredited practice teacher. She is now a full time trainer and consultant in England and Northern Ireland, and has trained many different professionals and workers both in the statutory, voluntary and private sectors. She has undertaken various research projects. Her publications include Good Practice in Supervision and Working with Elder Abuse and she co-edited Good Practice in Risk Assessment and Risk Management 1 with Hazel Kemshall.

Users Review
