**Drugs, Crime and Public Health: The Political Economy of Drug Policy** By Alex Stevens

*Drugs, Crime and Public Health* provides an accessible but critical discussion of recent policy on illicit drugs. Using a comparative approach - centred on the UK, but with insights and complementary data gathered from the USA and other countries - it discusses theoretical perspectives and provides new empirical evidence which challenges prevalent ways of thinking about illicit drugs. It argues that problematic drug use can only be understood in the social context in which it takes place, a context which it shares with other problems of crime and public health. The book demonstrates the social and spatial overlap of these problems, examining the focus of contemporary drug policy on crime reduction. This focus, Alex Stevens contends, has made it less, rather than more, likely that long-term solutions will be produced for drugs, crime and health inequalities. And he concludes, through examining competing visions for the future of drug policy, with an argument for social solutions to these social problems.

### Editorial Review

#### Review

**'penetrating and insightful... [Stevens] strikes exactly the right balance between accessibility and critical depth and has produced a book that will deservedly attract a wide readership.... I wish and hope that one or two presidents and prime ministers around the world end up reading a copy. Who knows what might happen then?' - Toby Seddon, *British Journal of Criminology*, Vol. 51 No. 4 (2011)**

**'This is an interesting, relevant and wide-ranging book written with passion. The central question of this book is why the poor and socially deprived bear most of the harms related to the use of illegal drugs, when the use of such substances is found in all sectors of society? To explore this question, Alex Stevens situates drug policy within the political economy of the distribution of power and resources in society. By doing this, he distances himself from the more drug centered conceptions of drug policy that dominate both academic literature and policy making. This opens for interesting perspectives on the role and the relevance of drug policy in the distribution of drug related harm.' - Esben Houborg, Center for Alcohol and Drug Research, Aarhus University, Denmark**

*"Drugs, Crime and Public Health provides a powerful diagnosis of the drug problem and is a must-read for anybody seriously interested in the subject. The analysis is thoughtful and nuanced, yet refreshingly concise and clear-sighted. Rather than academic dissembling, the political implications are laid bare, though the call for 'more reliable evidence on which to build drug policy' is tinged with irony. Stevens' own analysis suggests the evidence he presents will be unpalatable to those best placed to act on it and will almost certainly be subject to the processes of selectivity and silencing he describes. That said, the call for a progressive coalition has an air of realpolitik about it, encapsulating what might be taken as the book's core manifesto - drug policy is inevitably political, but is too important to be left to politicians and their advisors."* - Michael Shiner, *Druglink* (September/October 2013)

#### About the Author

Alex Stevens is a Professor in Criminal Justice at the University of Kent. He has worked on issues of drugs, crime and health in the voluntary sector, as an academic researcher and as an adviser to the UK government, and has published extensively on these issues.

### Users Review

#### From reader reviews:

##### Shirley Frazier:

### **Richard Eby:**

Why? Because this Drugs, Crime and Public Health: The Political Economy of Drug Policy is an unordinary book that the inside of the guide waiting for you to snap this but latter it will jolt you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such amazing way makes the content on the inside easier to understand, entertaining means but still convey the meaning totally. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of advantages than the other book include such as help improving your proficiency and your critical thinking technique. So , still want to postpone having that book? If I have been you I will go to the guide store hurriedly.

### **Mary Tobin:**

Your reading sixth sense will not betray anyone, why because this Drugs, Crime and Public Health: The Political Economy of Drug Policy e-book written by well-known writer we are excited for well how to make book that may be understand by anyone who all read the book. Written inside good manner for you, leaking every ideas and composing skill only for eliminate your hunger then you still question Drugs, Crime and Public Health: The Political Economy of Drug Policy as good book not only by the cover but also by content. This is one e-book that can break don't assess book by its protect, so do you still needing a different sixth sense to pick this specific!? Oh come on your looking at sixth sense already alerted you so why you have to listening to yet another sixth sense.

### **Hazel Mercado:**

That publication can make you to feel relax. That book Drugs, Crime and Public Health: The Political Economy of Drug Policy was vibrant and of course has pictures on there. As we know that book Drugs, Crime and Public Health: The Political Economy of Drug Policy has many kinds or style. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that.
