JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) By James Sonderegger, Orin Blomberg, Kieran Milne, Senad Palislamovic

Whether your network is a complex carrier or just a few machines supporting a small enterprise, *JUNOS High Availability* will help you build reliable and resilient networks that include Juniper Networks devices. With this book's valuable advice on software upgrades, scalability, remote network monitoring and management, high-availability protocols such as VRRP, and more, you'll have your network uptime at the five, six, or even seven nines -- or 99.99999% of the time.

Rather than focus on "greenfield" designs, the authors explain how to intelligently modify multi-vendor networks. You'll learn to adapt new devices to existing protocols and platforms, and deploy continuous systems even when reporting scheduled downtime. *JUNOS High Availability* will help you save time and money.

- Manage network equipment with Best Common Practices
- Enhance scalability by adjusting network designs and protocols
- Combine the IGP and BGP networks of two merging companies
- Perform network audits
- Identify JUNOScripting techniques to maintain high availability
- Secure network equipment against breaches, and contain DoS attacks
- Automate network configuration through specific strategies and tools

This book is a core part of the Juniper Networks Technical Library™.

Editorial Review

About the Author

James Sonderegger (JNCIE-M #130, JNCIS-FWV, JNCIS-ER, and Juniper Certified Instructor) holds a MS in IT Management and is a Resident Engineer Manager on Juniper Networks' Professional Services Team. James spent five years as an Engineer in Residence for Federal customers and has been in the networks industry for the last twelve years. His former employers include The Analysis Corporation (TAC), Ericsson IP Infrastructure, and Automated Data Processing. James was a co-author on "Juniper Networks Reference Guide. Routing, Configuration, and Architecture", ISBN 0201775921, Addison-Wesley Publishing, 2002.

Orin Blomberg (CCNP, CCSP, CCIP, CCVP, CCDP, JNCIS-M, JNCIS-FWV, JNCIS-ER, JNCIA-IDP, JNCI) is the technical lead for SSL VPNs and remote access at the Washington State Department of Information Service. His primary responsibilities include providing remote access and secure connectivity for state agencies, county, city governments, and tribal nation governments, as well as connectivity to federal agencies. His former employers include General Dynamics C4 Systems, Ericsson IP Infrastructure, and the US Army.

Kieran Milne (JNCIE-M #380, JNCIS-ER, JNCIA-WX, JNCIA-EX, JNCIA-E, JNCI, CCNA, Nortel NCTS) is a training developer and technical trainer within the Education Services department at Juniper Networks. With over ten years of experience in the networking industry, Kieran has taught all over the world, in both corporate and college settings. Before joining Juniper Networks, Kieran spent time at Nortel Networks and Alcatel. He is the author of the O'Reilly book JUNOS Networking Essentials, and contributes to exam development for the Juniper Networks Technical Certification Program. Kieran lives and works out of Canada.

Senad Palislamovic (JNCIE-M #145 and JNCIS-E) is a Professional Services Engineer at Juniper Networks, where he consults, designs, and implements MPLS enabled NGEN services for largest global ASPs and financial networks. He has also worked as a JTAC Engineer troubleshooting major ISPs' networks. Before JTAC, Senad held various network positions at Weber State University where he designed and implemented scalable network solutions. Senad holds B.S Degree in Telecommunications and IS&T from Weber State University and has over 10 years of experience in various enterprise and ISP networking technologies. He lives in New York with his wife Samera.

Users Review

From reader reviews:

John Wilson:

The book JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) give you a sense of feeling enjoy for your spare time. You need to use to make your capable more increase. Book can to be your best friend when you getting stress or having big problem with the subject. If you can make reading

through a book JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) to get your habit, you can get much more advantages, like add your current capable, increase your knowledge about several or all subjects. You are able to know everything if you like wide open and read a reserve JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide). Kinds of book are several. It means that, science e-book or encyclopedia or some others. So , how do you think about this guide?

Thomas Mitchell:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, likely to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the e-book untitled JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) can be very good book to read. May be it may be best activity to you.

Danielle Burdette:

Reading a book to be new life style in this year; every people loves to examine a book. When you examine a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, as well as soon. The JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) provide you with new experience in looking at a book.

Tom Harris:

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book ended up being rare? Why so many query for the book? But just about any people feel that they enjoy for reading. Some people likes reading through, not only science book but novel and JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) as well as others sources were given expertise for you. After you know how the truly great a book, you feel wish to read more and more. Science e-book was created for teacher or students especially. Those publications are helping them to add their knowledge. In some other case, beside science guide, any other book likes JUNOS High Availability: Best Practices for High Network Uptime (Animal Guide) to make your spare time much more colorful. Many types of book like here.
