Manual of Childhood Infection: The Blue Book (Oxford Specialist Handbooks in Paediatrics) By Mike Sharland, Karina Butler, Andrew Cant, Ron Dagan, Graham Davies, Ronald de Groot

Infectious diseases remain a leading cause of child morbidity and mortality worldwide. Now in its fourth edition, *Manual of Childhood Infections* is a simple-to-use, evidence-based, and practical handbook on how to recognize, investigate, and manage both common and rare infectious diseases in children and babies. Endorsed by the Royal College of Paediatrics and Child Health and the European Society for Paediatric Infectious Diseases, this fully updated version of the established 'Blue Book' complements the Pan European initiatives and UK diploma courses to harmonise patient management and training in Paediatric Infectious Diseases (PID), making it essential reading for UK and European paediatricians.

Manual of Childhood Infections is divided into two alphabetized sections for easy access to information, covering key diagnosis and management features of infections alongside crucial points of epidemiology and clinical features. This fourth edition forms practical reading for practising paediatricians, featuring updates to all key chapters based on a literature review alongside new chapters focusing on emerging problems for Europe.
