The Boxer Codex: Transcription and Translation of an Illustrated Late Sixteenth-Century Spanish Manuscript Concerning the Geography, Ethnography, ... (European Expansion and Indigenous Response) From Brill Academic Pub

In *The Boxer Codex*, the editors have transcribed, translated and annotated an illustrated late-16th century Spanish manuscript. It is a special source that provides evidence for understanding early-modern geography, ethnography and history of parts of the western Pacific, as well as major segments of maritime and continental South-east Asia and East Asia. Although portions of this gem of a manuscript have been known to specialists for nearly seven decades, this is the *first* complete transcription and English translation, with critical annotations and apparatus, and reproductions of all its illustrations, to appear in print.
