### **Towards Sustainable Use of Rangelands in North-West China** From Springer

Towards Sustainable Use of Rangelands in China's North West is based on the program of the International Conference Implementing GEF Objectives in a Systems Framework held in Lanzhou, Gansu, China in October 2008. This collection reviews the extent of resource debasement in China's pastoral zones and offers solutions for their sustainable use. The five parts deal with rangelands, and the people who manage them, and assess prospects for implementation of more sustainable rangeland/livestock production systems. Topics include Livestock husbandry development and agro-pastoral integration in Gansu and Xinjiang; Ecological restoration and control of rangeland degradation. Despite widespread degradation, the articles reveal the approaches that are likely to lead to recovery of these rangelands and better livelihoods for the local herders and farmers. Two chapters are devoted to the achievement of global environmental objectives. Carbon sequestration and biodiversity conservation in mountain grasslands are just a few of the covered subjects. This portion of the book pays special attention to the successful results in Gansu and Xinjiang – major regions of China's pastoral lands. The final division addresses measures to improve the profitability and sustainability of herding and farming in the pastoral areas of north-west China. There are fifteen chapters on subjects that include: Livestock management, Rangeland management interventions, Agro-pastoral integration, Improved animal husbandry practices as a basis for profitability. Land tenure and access, Environmental education, Ecological Restoration and New Management approaches for China's northwest pastoral areas.

## **Editorial Review**

### **Review**

“Towards Sustainable Use of Rangelands in North-West China to be thoughtful, well structured, informative ... and readable. The contributing authors provide an accessible introduction to the challenges facing North-West China's rangelands and document a variety of practical approaches to address these. Recommended for readers with an interest in social and environmental change, mountain ecosystems, and natural resource management.” (Hilary Howes, *Asian Highlands Perspectives*, Vol. 40, 2016)

“The chapters are clearly presented and the summaries of key points at the beginning of each chapter are very useful. The book also benefits from the contemporary nature of the data set on which it draws; this is especially important in the context of rapid political, economic, and climate change. ... In summary, this is a valuable book that will undoubtedly be of interest to scholars of pastoralism and of the region.” (Caroline Upton, *Mountain Research and Development*, Vol. 31 (2), May, 2011)

### **From the Back Cover**

This book reviews the extent of resource debasement in China's pastoral zones and offers solutions for their sustainable use. This book draws upon the large body of Chinese language literature that is generally inaccessible to the English language audience. By having joint editors/contributors who are Chinese specialists of high repute we can “unlock” much useful data and synthesize the current thinking in China of government agencies and academic circles toward the notion of a systems approach to environmental management. This book reviews the extent of resource debasement in China's pastoral zones and offers solutions for their sustainable use. The 5-parts deal with rangelands, and the people who manage them, and assess the prospects for rehabilitation. Topics include Livestock husbandry development and agro-pastoral integration in NW China; Ecological restoration and control of rangeland degradation. Despite widespread degradation, the book reveals the possibilities for rehabilitation and the implementation of sustainable use and for reclamation of degraded lands. There are fifteen chapters on subjects that include: Livestock management, Rangeland management interventions, Agro-pastoral integration, Improved animal husbandry practices as a basis for profitability. Land tenure and access, Environmental education, Ecological Restoration and New Management approaches for China's northwest pastoral areas. Two chapters are devoted to the achievement of global environmental objectives. Carbon sequestration and biodiversity conservation in mountain grasslands are just a few of the covered subjects. This portion of the book pays special attention to the successful results in Gansu— a major region of China's pastoral lands. The final division addresses measures to improve the profitability and sustainability of herding and farming in the pastoral areas of north-west China. These and other innovative ideas make *Towards Sustainable Use of Rangelands in China's North West* a valuable addition to any environmental library. It is vitally important that a beginning is made on addressing the issues raised here. It is timely that the direction be set and the first steps taken in that direction. If this book can help in the process of achieving better resource management in NW China, we will feel truly rewarded.

## **Users Review**

### **From reader reviews:**

**John Oliver:**

Reading a guide tends to be new life style with this era globalization. With studying you can get a lot of information that can give you benefit in your life. With book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story as well as their experience. Not only the storyline that share in the guides. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors nowadays always try to improve their skill in writing, they also doing some exploration before they write with their book. One of them is this Towards Sustainable Use of Rangelands in North-West China.

**Jessica Keith:**

This Towards Sustainable Use of Rangelands in North-West China is great publication for you because the content that is full of information for you who also always deal with world and still have to make decision every minute. This book reveal it information accurately using great plan word or we can declare no rambling sentences in it. So if you are read the item hurriedly you can have whole data in it.
