Data Structures and Algorithms By Alfred V. Aho, Jeffrey D. Ullman, John E. Hopcroft

The authors' treatment of data structures in *Data Structures and Algorithms* is unified by an informal notion of "abstract data types," allowing readers to compare different implementations of the same concept. Algorithm design techniques are also stressed and basic algorithm analysis is covered. Most of the programs are written in Pascal.

Editorial Review

From the Back Cover

The authors' treatment of data structures in "Data Structures and Algorithms" is unified by an informal notion of "abstract data types," allowing readers to compare different implementations of the same concept. Algorithm design techniques are also stressed and basic algorithm analysis is covered. Most of the programs are written in Pascal.

Users Review

From reader reviews:

John Cleveland:

Book is to be different for every grade. Book for children right up until adult are different content. As we know that book is very important for all of us. The book Data Structures and Algorithms was making you to know about other information and of course you can take more information. It is very advantages for you. The reserve Data Structures and Algorithms is not only giving you much more new information but also to be your friend when you experience bored. You can spend your own personal spend time to read your publication. Try to make relationship with all the book Data Structures and Algorithms. You never really feel lose out for everything in case you read some books.

Robert Bell:

The particular book Data Structures and Algorithms has a lot of information on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research prior to write this book. This particular book very easy to read you can find the point easily after perusing this book.

Carla Ramirez:

Playing with family in the park, coming to see the coastal world or hanging out with buddies is thing that usually you will have done when you have spare time, subsequently why you don't try thing that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Data Structures and Algorithms, it is possible to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't get it, oh come on its named reading friends.

Juan Crowe:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library or

even make summary for some reserve, they are complained. Just tiny students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Data Structures and Algorithms can make you sense more interested to read.
