The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series)

By Eric Jendrock, Ian Evans, Devika Gollapudi, Kim Haase, Chinmayee Srivathsa

The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) By Eric Jendrock, Ian Evans, Devika Gollapudi, Kim Haase, Chinmayee Srivathsa

The Java EE 6 Tutorial: Basic Concepts, Fourth Edition, is a task-oriented, example-driven guide to developing enterprise applications for the Java Platform, Enterprise Edition 6 (Java EE 6). Written by members of the Java EE 6 documentation team at Oracle, this book provides new and intermediate Java programmers with a deep understanding of the platform.

Starting with expert guidance on web tier technologies, including JavaServer Faces and Facelets, this book also covers building web services using JAX-WS and JAX-RS, developing business logic with Enterprise JavaBeans components, accessing databases using the Java Persistence API, securing web and enterprise applications, and using Contexts and Dependency Injection for the Java EE platform.

This edition contains extensive new material throughout, including detailed introductions to the latest APIs and platform features, and instructions for using the latest versions of GlassFish Server Open Source Edition and NetBeans IDE. Key platform features covered include

- Convention over configuration, so developers need specify only those aspects of an application that vary from the convention
- Annotated POJOs (Plain Old Java Objects) with optional XML configuration
- Simplified but more flexible packaging
- Lightweight Web Profile that is ideal for developing web applications

The Java Series…from the Source
 Since 1996, when Addison-Wesley published the first edition of *The Java Programming Language* by Ken Arnold and James Gosling, this series has been the place to go for complete, expert, and definitive information on Java technology. The books in this series provide the detailed information developers need to build effective, robust, and portable applications and are an indispensable

resource for anyone using the Java platform.

The Java Series...rom the Source
 Since 1996, when Addison-Wesley published the first edition of *The Java Programming Language* by Ken Arnold and James Gosling, this series has been the place to go for complete, expert, and definitive information on Java technology. The books in this series provide the detailed information developers need to build effective, robust, and portable applications and are an indispensable resource for anyone using the Java platform.

About the Author
The authors are all members of the Java EE 6 documentation team at Oracle. **Eric Jendrock** leads the Java EE Tutorial team and documents Java Servlet technology and Java security. **Ian Evans** documents Enterprise JavaBeans, Java Persistence API, Bean Validation, Java Transaction API, JAX-RS, and JAX-WS. **Devika Gollapudi** documents JavaServer Faces technology and Facelets. **Kim Haase** documents Contexts and Dependency Injection for the Java EE platform, Java security, and Java Message Service (JMS). **Chinmayee Srivathsa** documents resource connections.

Users Review

From reader reviews:

Wendy Lambert:

The particular book The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) will bring that you the new experience of reading a book. The author style to explain the idea is very unique. When you try to find new book to learn, this book very acceptable to you. The book The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) is much recommended to you to see. You can also get the e-book from your official web site, so you can quickly to read the book.

Lois Huseby:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their spare time with their family, or all their friends. Usually they performing activity like watching television, going to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Could possibly be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the reserve untitled The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) can be good book to read. May be it is usually best activity to you.

Peggy Gillman:

Your reading sixth sense will not betray a person, why because this The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) reserve written by well-known writer who knows well how to make book which can be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and composing skill only for eliminate your current hunger then you still skepticism The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series) as good book not just by the cover but also through the content. This is one book that can break don't determine book by its include, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading sixth sense already told you so why you have to listening to yet another sixth sense.

Mildred Shaw:

What is your hobby? Have you heard this question when you got pupils? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person such as reading or as studying become their hobby. You need to know that reading is very important and also book as to be the point. Book is important thing to include you knowledge, except your current teacher or lecturer. You will find good news or update with regards to something by book. Different categories of books that can you go onto be your object. One of them is actually The Java EE 6 Tutorial: Basic Concepts (4th Edition) (Java Series).
