The Science of Learning By Joseph J. Pear

For over a century and a quarter, the science of learning has expanded at an increasing rate and has achieved the status of a mature science. It has developed powerful methodologies and applications. The rise of this science has been so swift that other learning texts often overlook the fact that, like other mature sciences, the science of learning has developed a large body of knowledge. *The Science of Learning* comprehensively covers this knowledge in a readable and highly systematic manner. Methodology and application are discussed when relevant; however, these aspects are better appreciated after the reader has a firm grasp of the scientific knowledge of learning processes. Accordingly, the book begins with the most fundamental and well-established principles of the science and builds on the preceding material toward greater complexity. The connections of the material with other sciences, especially its sister science, biology, are referenced throughout. Through these frequent references to biology and evolution, the book keeps in the forefront the recognition that the principles of learning apply to all animals. Thus, in the final section the book brings together all learning principles studied in research settings by demonstrating their relevance to both animals and humans in their natural settings. For animals this is the untamed environment of their niches; for humans it is any social environment, for *Homo sapiens* is the social and learning animal par excellence.

Editorial Review

About the Author

Joseph J. Pear received his B.S. from the University of Maryland and M.A. and Ph.D. from The Ohio State University. He is currently a professor of psychology at the University of Manitoba. A fellow of Division 6 (Behavioral Neuroscience and Comparative Psychology) and Division 25 (Behavior Analysis) of the American Psychological Association, Pear does both basic and applied behavioral research. For his applied research, he developed the Computer-Aided Personal System of Instruction (CAPSI), an instructional program based on the Keller Plan. CAPSI is an award winning web-based program that is used to teach courses at the University of Manitoba and other universities in Canada and the United States. It is also a research tool that he and his graduate and undergraduate students use to study the teaching and learning dimensions of university education and institutional staff training. For his basic research, he developed a video-training system that he and his graduate and undergraduate students have used to study pigeon operant behavior and currently use to study fish operant behavior. In addition to *The Science of Learning*, Pear has written two other books, also published by Taylor & Francis: *Behavior Modification: What It Is and How to Do It* with Garry Martin, now in its 10th edition, and *A Historical and Contemporary Look at Psychological Systems*. Pear has also written numerous research articles, book chapters, and encyclopedia articles.

Users Review

From reader reviews:

Wesley McFarland:

What do you about book? It is not important to you? Or just adding material when you want something to explain what yours problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They have to answer that question mainly because just their can do this. It said that about guide. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular The Science of Learning to read.

Jeff Sanchez:

You can spend your free time to learn this book this e-book. This The Science of Learning is simple to deliver you can read it in the park your car, in the beach, train and soon. If you did not possess much space to bring the actual printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Roger Hodge:

With this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple way to have that. What you should do is

just spending your time almost no but quite enough to enjoy a look at some books. On the list of books in the top list in your reading list is definitely The Science of Learning. This book and that is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and review this reserve you can get many advantages.

Brenda Lewis:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book.
