Glia (Cold Spring Harbor Perspectives in Biology) From Cold Spring Harbor Laboratory Press

The majority of cells in the nervous system are glia. Long thought of as passive bystanders, glial cells are increasingly being appreciated for their active roles in nourishing, supporting, and protecting the neuronal cells that relay electrical signals through the nervous system.

Written and edited by experts in the field, this collection from *Cold Spring Harbor Perspectives in Biology* examines the development of the major classes of glial cells-astrocytes, oligodendrocytes, Schwann cells, and microglia-and their roles in normal physiology and disease. The contributors describe how glia help establish and refine synaptic connections, maintain the metabolic and ionic milieu of nerve cells, myelinate axons, modulate nerve signal propagation, and contribute to the blood-brain barrier. The biological characteristics of glial cells in vertebrate and invertebrate model systems, including those of *Drosophila*, *Caenorhabditis elegans*, and zebrafish, are also covered.

The authors also discuss the roles of glia in repair and regeneration, as well as in cancer and neurodegenerative diseases (e.g., Alzheimer's). This volume is therefore a valuable reference for all neurobiologists and biomedical scientists wishing to understand these diverse and dynamic cells.

Editorial Review

About the Author

Beth Stevens is a teacher who loves to make learning easy for struggling students who don't have the skills they need to succeed. She has been a specific learning disabilities teacher at the primary level for more than 20 years. Beth is a fifth-generation Floridian and comes from a long line of teachers. Terri Heidger and Beth Stevens are The Apron Ladies and co-authors of *Become a Good Reader: Six Simple Steps and Ready-to-Go Comprehension: Easy Activities for All Readers*.

Users Review

From reader reviews:

Gail Kernan:

Here thing why this Glia (Cold Spring Harbor Perspectives in Biology) are different and reliable to be yours. First of all examining a book is good however it depends in the content of the usb ports which is the content is as delightful as food or not. Glia (Cold Spring Harbor Perspectives in Biology) giving you information deeper since different ways, you can find any e-book out there but there is no e-book that similar with Glia (Cold Spring Harbor Perspectives in Biology). It gives you thrill reading journey, its open up your own personal eyes about the thing that happened in the world which is possibly can be happened around you. You can easily bring everywhere like in park your car, café, or even in your approach home by train. When you are having difficulties in bringing the branded book maybe the form of Glia (Cold Spring Harbor Perspectives in Biology) in e-book can be your alternate.

Joseph Gee:

Playing with family in a very park, coming to see the sea world or hanging out with friends is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Glia (Cold Spring Harbor Perspectives in Biology), it is possible to enjoy both. It is good combination right, you still desire to miss it? What kind of hangout type is it? Oh come on its mind hangout folks. What? Still don't get it, oh come on its named reading friends.

Richard Shumate:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you read a book you can get a large amount of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, in addition to soon. The Glia (Cold Spring Harbor Perspectives in Biology) provide you with new experience in reading a book.

Michael Lockwood:

What is your hobby? Have you heard that question when you got learners? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as studying become their hobby. You must know that reading is very important and also book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You discover good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is this Glia (Cold Spring Harbor Perspectives in Biology).
